

What is Cardiac Electrophysiology?

The Cardiac Electrophysiology Ontology contains terms describing single-channel electrophysiological experiments and data obtained using voltage-clamp, current clamp and fluorescence imaging techniques applied at the cell level and multi-channel fluorescence imaging techniques applied at the cell, tissue and whole heart levels.

Discuss Cardiac Electrophysiology Terminology

Please go to the [Cardiac Electrophysiology discussion page](#) to leave comments regarding the Cardiac Electrophysiology Terminology.

Examples of comments may include:

- How you are using this terminology
- Why you decided to use (or not use) this terminology
- Strengths or limitations of the terminology
- Comparisons to other similar terminologies
